

Hebei Leiman Filter Material Co., Ltd.

One Stop Solution Designer to Filter Production

PL-AUTO55-1050FM

Automatic Four-generation Folding Machine

Product Name	PL-AUTO55-1050FM
Max Width	1050 mm
Adjustable Pleating Height	4–100 mm
Pleating Speed	0–220 pleats/min
Power Supply	380 V / 50 Hz
Motor Power	5 kW
Preheating Power	16 kW
Heating Temperature	Normal–250 °C
Working Air Pressure	0.6 MPa
M/C Weight	700 kg
M/C Size (L × W × H)	2600 × 1800 × 1800 mm

Applications

This production line is suitable for the automobile industry three, hydraulic industry, purification industry, the water treatment industry.

The folding machine adopts upper and lower knife alternatively perform folding, from the knife automatic adjustment by computer, can reach different fold higher requirements and accurate size.

This machine can also be folded all the different rules of fold change.

In the paper folding machine automatic dotting counter, folding processing and preheating and forming etc.

Folding knife of this machine can change any angle, ensure the folding does not damage any kind of filter material.
