

Hebei Leiman Filter Material Co., Ltd.

One Stop Solution Designer to Filter Production

PLCY-200

Diesel Filter Comprehensive Test Bench

Applications

The test rig is used to detect the filtration efficiency and clogging life of the diesel filter.

Product Name	PLCY-200
Max. Capacity Of Oil Tank	50 L
Flow Precision	1 Grade
Temperature Precision	$\leq \pm 1$ °C
Pressure Precision	0.5 Grade
Motor Power	0.25 kW
Power Supply	380/50 V/Hz
Working Air Pressure	0.6 MPa
M/C Weight	500 kg
M/C Size (L × W × H)	1500 × 810 × 1620 mm

-  It is mechanical-electrical-pneumatic integration, with structure compact and easy to be operate, and high automatic degree.
-  Using the U type pressure gauge, pressure gauge measurement system of double precision pressure gauge.
-  Mixing system is utilized to make the impurities and oil evenly blended.
-  Equipped two 0.8 μm stainless steel precise filters to ensure the testing oil clean.
-  The working table and oil tank are all made of stainless steel, and the pipelines uses excellent copper tubing and coupler.
-  Test criterion: JB/T8122-1999, ISO4020.
