

Hebei Leiman Filter Material Co., Ltd.
One Stop Solution Designer to Filter Production

PLCZ200-2550-II

Knife Pleating Machine

Product Name	PLCZ200-2550-II
Max. Width	2550 mm
Adjustable Pleating Height	50–200 mm
Speed	0–100 pleats/min
Power Supply	380 V / 50 Hz
Motor Power	1.1 kW
Pre-heater Power	8 kW
Heating temperature	Normal – 200 °C
Working Air Pressure	0.6 MPa
M/C Weight	1600 kg
M/C Size (L × W × H)	2870 × 1720 × 1800 mm

Features

- The pleater uses upper and lower blades to alternately finish the folding, and then different pleating heights are acquired evenly and accurately by automatically adjusting the blades' distance.
- After marking, the filter paper will be pleated and pre-heated.
- The machine is also suitable for folding the iron wire fabric and non-woven fabric of the hydraulic filter, even the multilayer folding.

Applications

The production line is applied to auto tri-filter industry, hydraulic pressure, purification and water treatment industries, etc.
