

PLGY-450

Auto HDAF Mesh Hooking and Pressing Machine

Specification

- Product Name: PLGY-450
- Pipe Diameter: 120–450 mm
- Maximum Network Management Length: 650 mm
- Production Efficiency: Approximately 3 to 6 pieces per minute (depending on diameter)
- Total Power: 6 kilowatts
- Air Pressure: 0.6 Mpa
- Power Supply: 380 V
- Overall Dimensions: 1700 × 1500 × 1800 mm

Features

- High production capacity. The machine outputs about 3–6 pieces per minute (depending on pipe diameter), boosting production efficiency.
- Automated operation. Fully automatic system with simple operation, reducing manual work and ensuring stable, consistent production.
- High adaptability. Handles hooking and crimping of filter edges for 120–450 mm pipes, supporting both flat and circular designs to meet diverse product requirements.

Application

- This machine is suitable for the outer edges of air filters, supporting both flat and round hooks.
