

PLLG-2

Gluing Machine

Specification

- Product Name: PLLG-2 gluing machine
- Power Supply: 400 V, 50 Hz
- Power Consumption: Approximately 10.5 kW
- Equipment Components: 1 centerline glue dispenser, 2 hot melt dispensers, 7 sets of glue guns and hoses
- Glue Dispenser Technical Parameters: 2 glue dispensers, 7.5 kW power

Features

- Precise two-component glue mixing for consistent bonding quality.
- PLC-controlled automatic gluing adjusts glue length based on product size.
- 7 sets of zero-drip glue guns with independently adjustable glue length and spacing.
- Hot melt glue applicable to Teflon conveyor belt or directly to product surface.
- Intelligent digital control interface for easy parameter setting.
- Nickel-plated aluminum alloy frame provides durability and stability.
- Glue gun brackets adjustable in multiple directions (up/down/left/right).
- High adaptability with quick model change and flexible movement design.
