

PLM-BF-3015

Adjustable Outer Frame Forming Machine

Features

- Servo-controlled forming width adjustment with high precision
- Accurate length control with tolerance within 1 mm
- Servo-driven forming pressure rollers for high-speed operation
- Simple and intuitive HMI control interface
- Equipped with an automatic feeding rack
- Built-in counting and detection functions

Applications

Mainly used for the forming of filter outer frames.

Specification

- Product name: PLM-BF-3015
- Production capacity: 150–200 sets/hour
- Width range: 30–145 mm
- Total power: 7.5 kW, three-phase 380 V, four-wire system
