

PLM-JQ-1 Air Conditioning

Filter Edge Trimming Machine

Features

- **High Compatibility.** Processes filter sizes from 85–360 mm (length), ≥ 82.5 mm (width), and 10–39 mm (height).
- **High Efficiency.** Handles one unit every 20 seconds, greatly boosting production capacity.
- **Stable Performance.** Operates at 220 V, 0.6–0.8 MPa air pressure, with 12 kW power consumption.

Applications

- **Automotive Cabin Filter Production:** Final trimming stage to remove excess hardened edges, ensuring each filter meets precise dimensional and quality standards before packaging.

Specification

- **Product Name:** PLM-JQ-1
- **Product Ranges:**
Length: 85–360 mm
Width: Min.82.5 mm
Height: 10–39 mm
- **Voltage:** 220 V
- **Air Pressure:** 0.6–0.8 MPa
- **Power:** 12 kW
- **Efficiency:** 20 s/unit
- **Equipment Dimension (L x W x H):** 6000 x 1900 x 1800 mm
