One Stop Solution to your Filters Production

PLM-MJNK-1

Automatic Inner Frame Riveting Machine

Specification

- Product Name: PLM-MJNK-1
- Applicable Bag Thickness: 10 mm or less
- Efficiency: 40–50 seconds/each
- Operator: 1 person
- Power: 3 kW , 3–380 V
- Weight: 420 kg

Features

- Intuitive HMI control. Easy and accurate operation.
- Robust hydraulic system. Stable and smooth performance.
- Superior riveting quality. Firm joints with a clean, professional appearance.
- High efficiency & reliability. Ensures reliable performance for continuous production.

Application

For riveting bag filter frame bars and securing filter bags to frames.
