

PLM-TB-2-4

Dual Station Automobile Air Conditioning Filter Paste Four-Side Production Line

Features

- **Modular Dual-Unit Design.** Two double-side machines process all four edges in a compact layout.
- **Precision Corner Trimming.** Integrated trimming ensures clean, accurate corner finishing.
- **High working efficiency.** Retains standard double-side mechanics for easy maintenance and operation.
- **Flexible Workflow.** Allows staged processing for inspection and fine adjustment.
- **Cost-Effective Solution.** A competitive alternative to full four-side production lines.

Applications

This machine is designed for four-side edge bonding of cabin air filters using a staged double-side approach.

Specification

- **Product Name:** PLM-TB-2-4
- **Cycle Time:** 12–15 seconds/piece
- **Changeover Time:** ≤30 minutes
- **Product Size Range:** Length: 150–400 mm, Width: 150–300 mm, Height: 10–55 mm
- **Number Of Molds:** 2 for the long side, 2 for the short side
