One Stop Solution Designer to Filter Production

PLTN-63-8

Full-Auto Turntable Bypass Valve Welding Machine

Applications

This machine is suitable for the automatic welding machine for automobile diesel oil filter cover and fixed plates.

Product Name	PLTN-63-8
Rated capacity	63 kWa
Rated primary voltage	380/50 V/Hz
Phase number	1
Rated primary current	63 A
Working pressure	0.4 MPa
M/C Weight	850 kg
M/C Size (L × W × H)	1560 × 800 × 1700 mm

This machine has 8 stations on the work piece, the work piece automatically removed after welding.

The welding is through pneumatic pressing the electrode welding, and the welding current through direct heating method to reach the spot.

Welding time is short, high efficiency, stable welding quality.
