

Hebei Leiman Filter Material Co., Ltd.

One Stop Solution Designer to Filter Production

PLZJ-4

Full-Auto End Cap Gluing Machine

- Hot Gluing Machine
- Import Pump
- Computer Control Box

Applications

This machine is used for glue dispensing PVC on the end caps of the filter element.

Product Name	PLZJ-4
Available ID of The End Cap	50-110 mm
Max. End Caps Output	4 pcs/time
Speed	30-50 pcs/time
Viscosity of Glue	≤50000 cP
Glue kind	PVC (high temp.solidified adhesive)
Power Supply	380/50 V/Hz
Conveyor Motor Power	0.12 + 0.75 kW
Working Air Pressure	0.6 MPa
Pump Air Pressure	≤ 0.45 MPa
M/C Weight	400 kg
M/C Size (L × W × H)	1000 × 1600 × 1800 mm

-  The action of end caps loading and gluing can be regulated easily by computer control ,so it is coordinate and work normally.
-  This machine has the function of evenly gluing on the end cap of the filter.
-  This machine has excellent characteristics such as high efficiency and easy operation.
-  Adopts import gluing pump guarantee for accurately gluing.
-  Specially equipped the gluing tanks which make gluing much more evenly.
